

IN THE CLAIMS

The following claim listing replaces all prior claim listings:

1. (Original) A display unit, comprising:
 - a display panel including a substrate wherein display devices are formed; and
 - a touch panel which is directly bonded to a whole face of the display panel with an adhesive layer in between, and detects contact with a finger or a pen.
2. (Currently Amended) [[A]] The display unit according to claim 1, wherein the touch panel is provided on a side where the display devices of the substrate are formed, and the display devices are sealed by the touch panel.
3. (Currently Amended) [[A]] The display unit according to claim 1, wherein the touch panel has a structure wherein two plastic films in which respective transparent electrodes are formed are layered so that the transparent electrodes are placed opposite to each other.
4. (Currently Amended) [[A]] The display unit according to claim 1, wherein the display panel has a sealing substrate which is placed opposite to the display device side of the substrate, and the whole faces of the substrate and the sealing substrate are bonded together with an adhesive layer in between.
5. (Currently Amended) [[A]] The display unit according to claim 4, wherein the touch panel is provided on the sealing substrate on the side opposite to the substrate.
6. (Currently Amended) [[A]] The display unit according to claim 1, wherein the display device has an organic layer including a light emitting layer between a first electrode and a second electrode, and is an organic light emitting device which extracts the lights generated in the light emitting layer from the second electrode side.
